

Frequently Asked Questions GOPACS

Version 22-05-2019

1. How can I create orders for GOPACS?

First: Your company needs to be allowed to be trading for GOPACS. For further information about this, please contact Pol van der Linde at pol.vanderlinde@etpa.nl or Jorrit Nijholt at Jorrit.nijholt@etpa.nl.

If your company is allowed to trade for GOPACS you can create a normal intra-day order, but you should also add a valid EAN number and check the IDCONS checkbox (as shown in image 3).

The screenshot shows a 'New buy order' form with the following fields and values:

Select Company *	BotTrading 1 B.V.	EAN number	
Product *	Intraday	Date	21/03/2019
Start Hours	15	Start Minutes	30
End Hours	16	End Minutes	30
Capacity MW *	0	Price € *	0
Max: 1,000.0 MW			
Total price		Balance	€49,156,058.04
<input type="checkbox"/> Allowed for IDCONS		ADD METADATA	CANCEL SUBMIT

2. How can I create orders for GOPACS in the API?

In the Order-API we have added one additional field. This field is: "allowedToBeUsedForIdcons". This field must be set to true and the EAN should be filled in. Then your order can be used by the GOPACS platform.

3. Can the order for GOPACS also be used for normal intra-day trading?

Yes, the order that has been created for GOPACS (so the IDCONS toggle was set to true) can also be used for normal intra-day trading by other market participants. When the order is not traded for GOPACS. The freedom of redispach remains for your asset if it's not traded for GOPACS.

4. How do I know if my is traded with GOPACS or the intra-day market?

When you order has traded for GOPACS it will show a symbol next to the trade and it will also tell you that the order is traded with a grid operator when you open the details (see image 1 & 2). If it has not traded for GOPACS then you order is traded with the intra-day market and no visible congestion marker is shown.

Image 2 – Grid operator is shown when the order is traded with GOPACS

5. How can I see in the API if my order is traded for GOPACS.

Yes, there is an extra field in the reporting and trading API. This field is: "tradedForIdcons". If this field is true, then the order is traded for GOPACS.
