

## Nomination process after trading on the ETPA platform

ETPA applies two methods of physically nominating electricity to TenneT; via E-program (dual sided nomination aka **DSN**) or single sided transaction (**SST**).

All day-ahead trades (“Intraday +1”) before 13:30, are nominated by ETPA to TenneT via E-program. Your nomination to TenneT for ETPA must match this nomination in order for TenneT to clear the day and to clear the trades. If the nomination does not clear, you will receive an APERAK45 with an error message.

All day-ahead trades (“Intraday +1”) after 13:30 for are nominated by ETPA to TenneT via SST. All intra-day and Ex-post trades are also nominated via SST.

In case of SST nomination of the trade you do **not** need to submit anything on your side. The SST is an adjustment (delta position change to be precise) to ETPA on your already cleared E-program. We are authorized (in the application form of ETPA) to make these adjustments in your E-program via SST.

After each trade, you will receive an email with a trade confirmation. The confirmation includes the method of nomination used, being either dual sided nomination (**DSN**) or single sided transaction (**SST**). Please follow this nomination in your system’s configuration.

Below we have added an overview:

Nomination method				
	Trading times product	Before 13:30	After 13:30	Remark
For 15 minute products				
Ex-post / Ex-post -1	15 minutes after start delivery time of electricity, until 9:30am the day after start delivery time (Ex-post -1)	SST	SST	Always via SST.
Intraday	15 minutes before delivery up until midnight (24:00)	SST	SST	Always via SST
Intraday +1	Next day up until midnight	DSN	SST	At 14:00 the clearing of the day-ahead starts and when we get the confirmation of this clearing, the SST containing your trade is sent (mostly around 15/16h depending on TenneT’s clearing proces).
Intraday +2 (only on Fridays)	Complete Sunday up until midnight (24:00)	DSN	DSN	
For the products Baseload (00:00-24:00), Peak (08:00-20:00) and Off-peak (00:00-08:00 & 20:00-24:00)				
Day+1*	15 minutes before, the day starts	DSN	SST	At 14:00 the clearing of the day-ahead starts and when we get the confirmation of this clearing, the SST containing your trade is sent

				(mostly around 15/16h depending on TenneT' their clearing proces).
Day+2*	15 minutes +1 day, before the day starts	DSN	DSN	
Day+3*	15 minutes +2 days, before the day starts	DSN	DSN	
Day+4*	15 minutes +3 days, before the day starts	DSN	DSN	

\* These are workdays. So this calculation is corrected for weekends.
